

HaysMed Chooses Power Admin Over Competitors Because of Adaptability and Flexibility

Industry

Hospital and Medical

Location

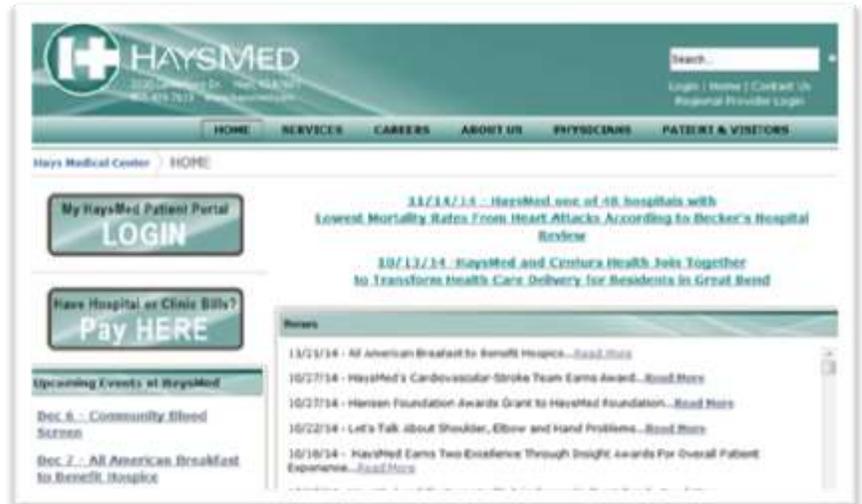

Hays, KS US

Company

2000+ Employees

2361 monitors configured

Spread across 350 systems

Why Power Admin?

We needed more than basic ping monitoring of systems. There was a need for adaptability and flexibility of any single monitoring application.

Has PA Server Monitor saved you or your company time and/or money?

Yes, we are much quicker to resolve problems before our users can even experience them.

Comments:

Forgive us for not even touching the bragging points! We'd have to leave that to some specially prepared doc/statement from hospital administration. :)

Were you looking at competitor products? If so, why did you choose PA Server Monitor over other products?

Yes we were looking at other products. We chose this because of the extreme expense of other products that offered anything close to PA Server Monitor software.

Highlights

For us, PA Server Monitor is about enabling us to provide the service we feel our clients deserve. It has been very useful in detecting server issues as they occur.
